EDUCATION

University of Arizona — Tucson, AZ | December 2026
Bachelor of Science in Computer Science; Bachelor of Science in Statistics & Data Science
Minor: Information Science, Technology & Arts

TECHNICAL SKILLS

Programming: Python, R, SQL, Java, C/C++
Data Science & ML: pandas, NumPy, scikit-learn, exploratory data analysis, feature engineering, classification, regression, cross-validation, model evaluation, reinforcement learning
Statistics & Visualization: Statistical modeling, hypothesis testing, model diagnostics, Streamlit, Tableau
Cloud & Tools: AWS S3, DynamoDB, PostgreSQL, Git/GitHub, Linux, Docker

TECHNICAL EXPERIENCE

Undergraduate Research Assistant — VIP, Getting to Know U | University of Arizona | Jan–May 2026
- Developed AWS S3 and DynamoDB data storage and retrieval workflows for a university degree-planning platform.
- Built cloud data ingestion and transformation workflows supporting analytics, dashboards, and predictive modeling initiatives.

Software & Autonomy Lead — STAR-X, NASA Lunabotics | Nov 2025–Present
- Lead ROS-based rover autonomy software development for navigation, control, and telemetry integration across subsystems.

Undergraduate Teaching Assistant — Department of Computer Science | University of Arizona | Jan–May 2025
- Supported 100+ students in discrete mathematics; led review sessions on proofs, graphs, trees, and combinatorics.

SELECTED DATA SCIENCE & MACHINE LEARNING PROJECTS

Tucson Crime Insights | Python, scikit-learn, Streamlit | Apr–May 2026
- Cleaned and engineered features from 243,127 Tucson Police Department crime incidents (2018–2025) for predictive analysis.
- Compared logistic regression, LDA, decision tree, random forest, and SVM with stratified cross-validation; built an interactive geographic analysis dashboard.

Dynamic Pricing using Reinforcement Learning | Python | CSC 496 course project
- Designed a simulated pricing environment with finite inventory, stochastic price-sensitive demand, and a fixed sales horizon.
- Implemented reinforcement-learning experiments to explore sequential pricing decisions using revenue less holding costs as reward.

Financial Collapse Indicators | R | Apr–May 2025
- Modeled economic conditions using approximately 6,000 cross-country observations (1990–2023) with linear and logistic regression.
- Evaluated predictors using Box–Cox transformations, VIF, Cook's distance, and model-selection diagnostics.

ADDITIONAL EXPERIENCE & LEADERSHIP

Front Office & Business Operations Student Worker | University of Arizona | Aug 2024–Present
- Support daily office operations and financial documentation, including purchasing-card reconciliation and reimbursements.

Assistant Training Manager — Tucson Meet Yourself | Tucson, AZ | 2026–Present
- Progressed from volunteer to Area Captain and Assistant Training Manager, coordinating volunteers and festival teams.
- Developing a training manual covering festival sections, volunteer roles, and operational guidance.
